

# Operating across the globe

 Solar power plants in operation: 584 MW

 Plants under construction: 1,071 MW

 Projects in backlog: 225 MW

In addition to projects in backlog, Scatec Solar holds a solid pipeline of projects totalling 4,454 MW across Latin America, Africa, Europe & Central Asia and Southeast Asia.

Employees:

**246**

In operation at year end:

**584 MW**

Full year 2018 production:

**681 GWh**

Greenhouse gas emissions avoided 2018:

**650,000 tons of CO<sub>2</sub>**

# How we work with sustainability

## Clean and sustainable energy

Scatec Solar develops, builds, operates, and owns solar power plants that generate clean and reliable electricity. Electricity is vital for the economic growth of nations and human welfare. We strive to increase access to clean, affordable, and renewable electricity generation in emerging markets.

## Governance

Sustainability is an integral part of our organisation and is embedded in all business units including project development, solutions/execution, asset management, and operations. The sustainability team in each country consists of both corporate support teams and specialists, as well as fieldworkers who report to the global headquarters and ultimately to the Executive Vice President of Sustainability, who forms part of the Management team reporting directly to the Board of Directors. The sustainability team develops key performance indicators reviewed by the Management annually. When relevant, both the Management and the Board of Directors review specific sustainability topics including health, safety,

security, and environment (HSSE), corruption, procurement, environmental and social impacts, and stakeholder engagement, usually on a monthly basis.

Scatec Solar has developed a policy for each material sustainability topic outlining the key principles and management approach governing the way we operate and address issues. The policy statements and management approach for material topics can be found at the beginning of each chapter of this report. Further information on our corporate governance can be found in the annual report and on our corporate website.

## Compliance

Scatec Solar is committed to operate in line with the Equator Principles and IFC's Environmental and Social Performance Standards to ensure consistent practices across all projects. We work with trusted partners such as the IFC, Norfund, KLP, and several larger development banks that all have high standards for the projects and their associated impacts.

## IFC's Performance Standards

IFC's Environmental and Social Performance Standards define IFC clients' responsibilities for managing their environmental and social risks

[www.ifc.org](http://www.ifc.org)

## The Equator Principles

A risk management framework adopted by financial institutions for determining, assessing and managing environmental and social risk in development projects

[www.equator-principles.com](http://www.equator-principles.com)

# Key highlights 2018

## Projects

### Doubled installed capacity

Grid connected 262 MW in 2018 - nearly doubled our installed capacity

**650,000 tons of CO<sub>2</sub>** emissions reduced from our solar plants in operation in 2018

**3.5 GW** Targeting 3.5 GW in operation and under construction by the end of 2021

## People

### Zero serious injuries

Delivered 6.3 mill working hours with no serious injuries

**6,000 jobs created** in projects under construction - the majority local and unskilled labour

**Diversity** Our total global workforce is represented by 32 nationalities

## Learnings

### Community relations

Grid connected the Los Prados plant in Honduras after social unrest locally, in large part caused by misinformation and resolved through a stronger social team and improved dialogue and interactions with the communities

### Resettlement

Livelihood restoration programme for 220 local households in Mozambique in line with IFC's Performance Standards

**Compliance** Strong efforts with Environmental & Social management to ensure compliance of all contractors and business partners with international standards and requirements in Egypt and other ongoing projects
